The Union for Senior Services, VALLI is a national non-profit umbrella organisation in Finland. VALLI promotes the rights, inclusion and well-being of old people nationwide. VALLI supports the diversity and technological inclusion of the older people. VALLI also supports civic activities, and encourages intergenerational cooperation. Together with VALLI`s member organisations, VALLI makes the voices of older people, and the people caring for them, heard. VALLI creates and coordinates several professional networks.

VALLI works actively in co-operation with its member organisations and professionals for supporting a welfare society where everyone can grow up and grow old in harmony. We work for and with older people to achieve policy change, involvement of the older people and interaction between generations.
Due to our experience of 70 years, we have both the recognition and the proven ability to reach and influence high-level politicians and decision makers in Finland.

The VALLI Gerontechnology Centre is a centre of expertise which assembles and shares information as well as coordinates user-oriented development related to technology for the older people.

The Trainee Initiative for Caring for the Older People promotes cross-generational work life by enhancing youth participation in elderly care.

The Centre of Older People´s Outreach Service Network provides practical support and help for local and regional actors already conducting or initiating outreach work for the older people.

Moni-ikä -project (2024–2026) promotes the equality of older people from the perspectives of language, culture, religion, and sexual and gender minorities. Together with our partners, we make visible the needs of ageing minorities and provide knowledge on how to meet these needs within services for older people.
